Quality Control Anyware will drive your success by streamlining costs, saving time, improving training, reducing errors, and monitoring real time information
- **FIRST-RATE INSTALLATION, TRAINING & SUPPORT**  
Personalized support and hands-on training

## OPTIMIZE QUALITY CONTROL

### WE UNDERSTAND YOUR CHALLENGES

Large customers now require expensive process certifications along each step of their supply chains – every facility, every year – with surprise inspections and spot audits thrown in for good measure.

Not only do these customers require you to meet ever more exacting standards, but they will hold you responsible for the mistakes of your own suppliers.

Small issues can metastasize into existential threats – especially when they involve recalls – if your systems cannot immediately trace the source of a problem. Don't be a headline for the wrong reason when a \$4,000 error turns into a \$20 million loss!

Government regulations continue to become ever more stringent, exacerbated by the need to “do something” after high-profile incidents.

### DESIGNED BY INDUSTRY VETERANS

We have designed innovative technology solutions and specialized applications for more than 25 years. We understand the business issues that are most critical to your profitability.

Certifications such as BRC, SQF and ISO are now minimum requirements to stay in business. By using *Quality Control Anyware*, our clients have reduced their certification expenses by up to \$300,000 per plant, per year – from 15-50% of their annual costs.

We offer solutions tailored to fit the needs of your business – whether it involves Food Safety, Beverage Safety, Pet Food Safety, Pharmaceutical Safety or general manufacturing.

*Quality Control Anyware* is fully integrated with the awardwinning X3 platform from Sage, the global leader in enterprise management software

**AnyWare**

## DETAILS AND ADDITIONAL FEATURES

The following table lists some of the details of the key features listed on the preceding page, as well as additional features that our clients have found useful.

<b>A Better Mousetrap</b>	Eliminate cumbersome and error-prone manual data entry. For example: snap a photo of your mousetraps using a tablet/phone, enter the number found, and the system automatically tracks the date, time and location.
<b>Facility Management</b>	Manage cleaning, equipment maintenance and pest control. Easily create performance logs to demonstrate compliance with best practices. Even better: use the data to predict areas where issues are likely to arise.
<b>Improved Accountability</b>	Improve visibility and accountability for hygiene, clothing, allergen management and other critical requirements. Identify and correct training deficiencies. Track and resolve complaints more quickly.
<b>Customer Specific Overrides</b>	We know that your big customers call the shots. Tailor your system to match their requirements without creating an unwieldy mess.
<b>Fast, Efficient Data Access</b>	Reduce the time wasted when your employees must dig through endless piles of three-ring binders. Locate the information you need during surprise customer audits in seconds, rather than hours or days.
<b>Integration with Certification Agencies</b>	Integrate and track the requirements of the various certification agencies – GMP, HACCP, SQF, BRC and ISO, among others.
<b>Seamless Integration</b> 	Save time and headaches with seamless integration between your front office operations and back office finance and accounting functions.
<b>Certificates of Analysis</b>	Easily handle COAs as well as internal and third party audits.
<b>Business Intelligence</b>	Turn your data into knowledge that you can act on with our powerful sorting, grouping, and filtering capabilities. Personalize these tools to match employees' specific needs and roles within the company.
<b>New Modules</b>	Add modules quickly and easily as your company grows. Branch into new lines of business with the confidence that your systems will continue to give you the real-time information you need.
